Subject Index

action potentials, 493
age-structured populations, 103
AIDS, 367
air, 399
alignment, 1
allergy, 1099
ammonium, 957
animal societies, 661
antibiotic, 923
aquatic ecosystem, 983
army ants, 471
arteries, 129, 753
autocatalytic, 19
  networks, 877
  reaction, 19

back propagation, 493
batch system, 265
bell-shaped functions, 285
bifurcation, 611, 983
binary character data, 449
biomathematics, 313
biometrics, 313
brain tumors 1047

calcium, 1075
cardiac output, 1155
changing variables, 43
channel gating, 141
chaos, 402
character data, 449
chemostat, 595
chemotherapy, 367, 425
ciliate, 265
coding, 493
collapsible tube, 611
  flows, 1023
colonization, 1187
community model, 265
  of ciliate, 247
comparison methods, 207
competition, 1187
competitive,
  environment, 425
  system, 1001
conflict, 203
cooperation, 203
costs, 739
cross-linking, 285

dendrites, passive, 493
density-dependence, 643
diffusion, 205
dispersal control, 615
distance measure, 449
disturbed environments, 1187
DNA, 1171
drug delivery, 1047
dynamical disease, 606

E. coli, 247, 265
ecological models, 207
ecology, 813
economics, 397
ecosystem, 983
elastic tubes, 939
environmental,
  fluctuations, 103
  gradients, 907
enzyme,
  kinetic data, 401
  organization, 719
epidemic models, 1019
evolution, 65, 99, 129, 391, 406
evolutionary,
  ecology, 813
  processes, 203
extinction time, 555

flow, 611
  rate, 753
fluctuations, 103
food-chain, 983
foraging, 739
forced oscillations, 1023
fractional order kinetics, 99

game theory, 406
gap, 1
gating, 141
genetic diversity, 103
granule model, 513
growth, 205, 409, 739
  microbial, 601

hierarchies, 661
human illness, 606

idiotypic,
  interactions, 285
  network, 1123
imipenem, 923
immunotherapy, 1099
individual-based models, 247
inhibitor, 19
instability, 402
interactions, 1123
interleukin-2, 569
interleukin-4, 569

laser, 513
linked populations, 643
lymphocytes, 569

Markovian model, 141
mass, 739
mathematical biology, 393
matrices, 1123
melanin, 513
metapopulation, 1187
metastasis, 425
microbial competition, 598
migration, 643
monitoring reaction, 19
morphometric synthesis, 313

PII S0092-8240(96)00084-5

nerve terminals, 1075
networks, 753, 877
neuron spatial extent, 493
nitrate, 957
nitrogen transformation cycle, 957
non-local, 1
non-sessile organism, 861
nonlinear,
  differential equations, 402
  dynamics, 601, 603
  modelling, 397
  science, 811

olfactory receptor neuron, 493
optimal control, 957
oscillations, 1023

parallel computation, 1075
penalty, 1
periodic chemotherapy, 425
pharmacodynamics, 923
phylogeny reconstruction, 449
phytoplankton, 957
population, 555
  changes, 907
  dynamics, 471
predator–prey, 835
predictability, 397
pressure, 753
profile, 1
Pseudomonas aeruginosa, 923
pulmonary mean transit time, 1155
pulse speed, 129
pulsed chemotherapy, 425

quantum mechanical analogy, 1001
quasi-steady state, 43

random,
  environments, 599
  walk, 596, 599

receptor neuron, 493
reciprocity, 861
recycling, 983
retina, 513

self-organization, 65
  hierarchies, 661
self-propagating species, 99
solitary waves, 939
species formation, 65
stability, 402, 643, 719
stage-structured populations, 103
stimulus intensity, 493
stochastic Markovian model, 141
supercoil, 1171

Tetrahymena, 247, 265
thermal damage, 513
transit time, 1155
treatment strategy, 367
trees, 753
tube flows, 1023
tumor, 1047
  recurrence, 425

vagueness, 207
variability, 207
vascular structures, 409
veins, 753

water, 399
weed,
  control, 615
  dispersal, 815
wound healing, 787

Yates–Pardee pathways, 719

zymogen, 19
